Humanitarian Engineering Program and the Engineering Without Borders at CSM presents:

Phil Clark, Mining engineer and former VP of
Resource Development for BHP Billiton, now Chair of Board
of Directors for EWB Australia

HILL HALL 202

TIME

2:00 - 3:15
PM

TOPICS

Engineering work with disadvantaged communities in sustainable
community development.

Ensuring that technical solutions to community problems are actually
appropriate to their context and embraced by the community

Examples of how EWB-Australia addresses issues of
inequality, poverty, community underdevelopment, in the
engineering sciences curriculum

Recommendations to future engineering graduates in
extractive industries to chart alternative career paths in
community development
