Discussion**

**Collaborative
brainstorming to
help you
understand that
there are many
options to follow
your passions
and dreams**

**Meet with
practitioners**

**Co Sponsors: EWB
and CSM Career
Center**

Fall 2013 Humanitarian Engineering Career Workshop

HERE'S THE SCOOP:

Have you wondered how you can pursue a career as an engineer and promote sustainable development for communities or design and build technologies for the poor at the same time?

Might you be struggling with decisions about getting a high-paid engineering job vs. serving communities to become more prosperous?

Can you do both? If you are interested in these questions join us for a highly interactive career workshop.
