

Career Opportunities in Humanitarian Engineering -- Personal Insights by: Jessica Kaminsky

An increasing number of engineering students are interested in humanitarian engineering topics, but like most students, are concerned about job prospects after graduation. This lecture will present my own career experiences in this field. In addition, I will present resources that can help students learn about and find career opportunities in humanitarian engineering. The session will be interactive with the goal of helping attendees take a real step towards identifying and then achieving their individual career goals.

Humanitarian Engineering Guest Lecture Series Fall 2013

Co-sponsored by EWB/B2P

**Wednesday, October 30
4 – 5 PM at Student Center Ballroom D**

Jessica Kaminsky is a PhD Candidate at the University of Colorado, Boulder. In January, she will begin an appointment as an assistant professor in the Department of Civil and Environmental Engineering at the University of Washington, Seattle. Her research investigates the social sustainability of infrastructure systems in developing communities. Prior to her graduate work, Jessica spent six years working internationally for CH2M HILL, one of the world's largest engineering firms.
