Kaitlin Litchfield

Why do engineers choose to do EWB/HE
and what does that mean for you?

Coolbaugh 219 12.30 - 2.00 PM

Tuesday, November 18th 2014

Kaitlin Litchfield is a PhD candidate in the Mortenson Center for Engineering in Developing Communities at the University of Colorado, Boulder. Her passions include equipping engineers to be able to address global development challenges, and her current research has been focused on understanding engineers involved specifically with Engineers Without Borders-USA as a means to inform changes needed within engineering education and industry.

Events are co-sponsored by
EWB/B2P

Jeff Walters

Management of Rural Water Services in
Nicaragua -- Highlighting Key Differences
Between Stakeholder Strategies

Hill Hall 202 12.30 - 2.00 PM

Thursday, November 20th 2014

Jeff is a PhD Candidate in Civil Systems Engineering at the University of Colorado and is a Mortenson Fellow in Engineering for Developing Communities (EDC). He has a BS in Civil Engineering and an MS in Structural Engineering from the University of Washington, along with an MS in Environmental Engineering from the University of Colorado Boulder focused on engineering for developing communities. Jeff's research interest and passion is focused on developing systems-based methods for the planning and maintaining of resilient and sustainable civil infrastructure built domestically as well as internationally.
