Shultz Family Leadership in Humanitarian Engineering Speaker Series

Guest Speaker: Deanna Kemp

Professor Deanna Kemp is an international researcher focused on the social aspects of the global mining industry. Dr. Kemp currently leads the Extractives and Communities Program at the Centre for Social Responsibility in Mining, which is part of the Sustainable Minerals Institute (SMI) at The University of Queensland.

The Value of Social Data in the Mining Industry

Large-scale mining has profound effects on social systems. To understand these effects, developers need access to social data in a form that can be operationalized. This talk explains why companies should invest in collecting and utilizing high quality, reliable, operationally-relevant social data.
